

Key Features the App Could Have

Client Support Requests

- Clients with M.E., fibromyalgia, and autoimmune conditions could request help for daily tasks.
- Automated matching system pairs them with local volunteers

Volunteer

- Volunteers can sign up for shifts based on their availability and location.

Secure Messaging & Video Calls

- Built-in chat & video support so clients can connect with support workers without needing to use external apps.

Digital Check-ins & Progress Tracking

- Clients and workers can log tasks and provide feedback on support sessions.
- Progress reports help improve service quality.

Funding & Donations Integration

- If users want to sponsor support hours for others, a simple donation function could help fund free services for those on PIP/ADP/Limited Work Capacity for Universal Credit.

Location-Based Matching

- Uses GPS to pair volunteers and workers with clients nearby, making services more efficient and cost-effective.

Integration with Colleges & Universities

- Students can log volunteering hours directly on the app for work experience validation.
- Potential to add a job board for those looking to transition into paid employment.

Payment

Automated Payment Tier System

- Clients input their financial details (or connect their bank for auto-verification).
- The app assigns them a pricing tier based on their submitted proof.
- Payments are handled through PayPal, or Direct Debit inside the app.

Booking & Payment at Checkout

- Full-paying clients book immediately and pay £30/hr upfront.
- Partial-paying clients see their adjusted rate (£10/£15/£20 per hour).
- Free client's book without a charge, and their slot is covered by Shallion Support's funding pot (but if they want to give something, there needs to be an option, even if it's just £1/hr).

Subscription Option (Optional)

- Instead of per-hour payments, clients could subscribe (e.g., £100/month for reduced-rate access).

Discretionary Fund for Those Who Can't Prove Income

- If someone genuinely needs help but can't submit docs, they request discretionary support inside the app.
- Admins (you) review and approve/reject requests manually.
- Funded by donations & social enterprise profits.

Funding the Free & Discounted Services

10% of the £30/hr revenue goes into the Social Enterprise Fund to support free clients.

Grants & Sponsors will help subsidise costs.

Donations via the app—people can donate to sponsor free service hours.
